

Flight In The Danger Zone - Non Towered Airport Operations

Operations at non-towered airports present a high risk mixing bowl of jets, turbo-props, single engine trainers and light sport aircraft. Some aircraft may not have electrical systems / communication ability. Learn what you can do to improve your safety and the safety of others in proximity of the airport and specifically in the traffic pattern. "Volunteer" to participate in a traffic pattern scenario based skit that gets everyone in the room involved. It might be that you see yourself in many of the traffic conflicts that occur in the skit. This presentation has been presented at numerous locations with much success. Seating is limited.

Directions: Board room in main terminal building. 910-692-3212.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
